

INPUT

number of sheep present in the array (true means present).

FUNCTION

OUTPUT

[true, true, true, false, true, true, true, true, true, false, true, false, true, false, false, true, true, true, true, false, false, true, true] = 17

1. set function countSheep with parameter arrayOfSheep

3. if (arrayOfSheep at the i point es equal to true)
// num++;

2. set for loop with three parameters; first parameter is a variable
i = 0; second parameter is, i is less than arrayOfSheep.length;
third parameter is, i plus plus.

4. // return num;
